

ILERBAG V

VERTICAL FORM, FILL AND SEAL MACHINE

The Ilerbag V is a vertical form fill & seal for large bags where the P.E . film is taken from the roll and formed into the bag shape then filled & sealed. This is ideal where long runs of the same bag are required

PACKWEIGH
INNOVATIVE PACKAGING SOLUTIONS

Benefits

- Total automation of the bagging process
Reduction on the operating costs, accelerates return of investment
- Flexibility and quickness on format' changes
- Output optimization at the bagging point
Maximum reliability throughout all the form, fill and seal process
- Simplicity of the system
- Versatility allowing to handle a wide variety of different formats
- Mechanical parts isolated from the product

Applications
