WELCOME TO PACKWEIGH

Thanks for taking the time to have a look at our product range.

Our range has come about as a result of years of Engineering expertise, specific industry knowledge, and a focus on great design.. Everything we offer here works.. and works brilliantly. That's our guarantee.

When our company (first known as QStitch) started, it focussed more on bag stitching, but as the product range grew, and our customer base became more diverse, Packweigh was formed.

Our "Innovation" series of products are named that way for a reason - we combine leading edge design and engineering, and aim to do more with less - to be innovative.

We realise our customers do not have unlimited machinery budgets, so our strength lies in tailoring affordable solutions that work. We use the latest 3D modelling systems to ensure our machinery works beautifully. Our drawings also ensure that you know exactly what you are getting.

Packweigh manufactures in our Brisbane based factory, but we also import selected equipment from South-east Asia and Europe. Quite often the best solution is a combination of local and overseas manufactured machinery.

We also carry an extensive range of spare parts. After sales service and back-up are essential, and we take that seriously. With Packweigh, you have a partner for the long term.

Often the first step is to have a chat to us about your requirements. We ask a lot of questions. We focus strongly on improving your factory efficiency and bottom line.

Look forward to talking to you,

Rod Wilson
Sales Director

Bagging Scales

Available in both Gross and Net weighing

Innofil A

Bagging scale with auger feed, suitable for powdered products. Available in both gross & net.

Innofil G

Bagging scale with gravity feed, suitable for free flowing products. Available in both gross & net.

Innofil B

Bagging scale with belt feed, suitable for products that don't flow evenly. Available in both gross & net.

Innofil VP

Bagging scale with vibratory feed designed for stand up pouch bags, small bags & containers. Available in both gross & net.

Bulk Bag Scales

Innobulk Series

This system is a bulk bag filling machine with an auto bag release available in Gravity feed, Auger feed and Belt feed.

Innobulk U

This is a bulk bag unloading system that can be manufactured with or without load cells & weigh controls if you need to remove a certain amount of product.

Automatic Bagging Systems

Innosac S

Automatic bagging machine for open mouth bags including poly woven, P.E & paper bags.

Ilersac R

Automatic bagging machine for open mouth bags. Carousel style bag loading & optional ultrasonic that will allow for product settling.

Ilersac V

Valve bag packer with automatic valve sealer.

Ilersac L

Automatic bagging machine for open mouth bags and will maintain gussets, also good for very dusty products.

Ilerbag H

Automatic bagging machine using tubular P.E. rolls.

Ilersac W

High speed open mouth bagging system for open mouth bags and very dusty products.

Ilerbag V

Vertical form, fill and seal machine ideal where long runs of the same bag are required.

Palletisers

Ilterpal C

High level palletiser giving extremely good stack quality.

Innopal R

Robot palletising system suitable for multiple pickup & placement positions.

Ilterpal W

High level palletiser ideal for stitched bags & capable of high speeds with a very high quality finished stack.

Ilterpal H

Hybrid palletiser is a combination of robot style gripper & high level palletiser. This gives the ability of over lapping bags & giving the best possible stack quality.

Product Batching

Innobatch Series

Batching systems designed to suit the customers requirements.

Bag Closing

Innosew A

Bag sewing system with automatic start/stop & thread cutting, also bag infeed system.

Innosew M

Manual bag sewing system with foot pedal operation.

GK-26-1A

Portable bag closing machine suitable for a large range of bags and pockets.

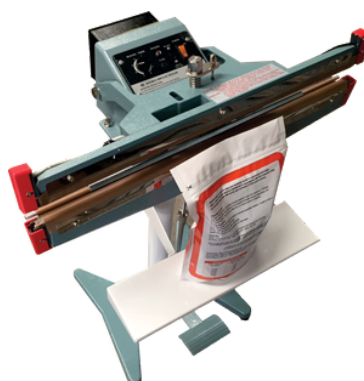

Newlong NP-7A

High speed portable bag closer with a plastic handle and lubricator.

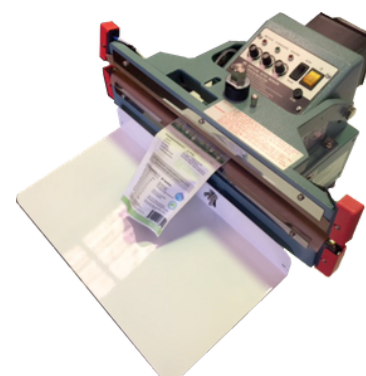

SuperSealer

Continuous feed sealer with hot air or band sealing

Innoseal P-01

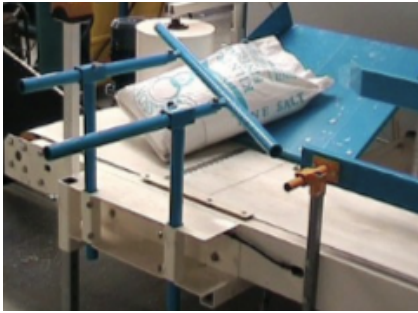

Foot pedal operated pulse sealer.

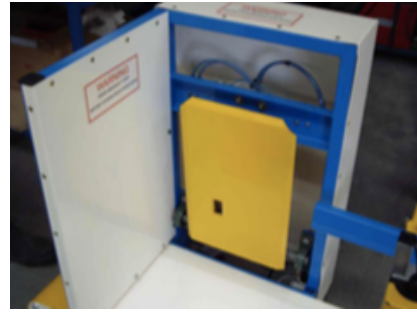

Innoseal P-450

Automatic pulse sealer with adjustable seal & cooling timers. Bench mounted.

Bag Transfers

Innotran I
Inline turner
transferring the
bag bottom
first.

Innotran T
90 degree bag
transfer from
bagging
conveyor
exiting with the
bag top first.

Innotran IT
Inline bag
turner that
grips the bag
by the top &
turns the
bag.

Innotran B
90 degree bag
transfer from
bagging
conveyor
exiting with the
