

INNOBULK G

BULK BAG FILLING MACHINE WITH AN AUTO BAG RELEASE.

The Innobulk G system is designed for the operator to hang the bag & slide the neck of the bag onto the inflatable bag clamp for a dust tight seal. The bag hangs freely so the product fills the bottom corners evenly. Once the weighing is complete, a fork lift is used to place a pallet under the bag & raise the bag, when the weight is lifted the hooks will release the bag automatically.

PACKWEIGH
INNOVATIVE PACKAGING SOLUTIONS

Features

- Rinstrum panel mount weigh controller
- LCD display with LED back lighting
- 24vdc controls
- Supports optical communication with a PC
- IP 65 enclosure
- 4- high quality shear beam load cells
- Powder coated mild steel construction
- Provision to move the unit with a fork lift
- Inflatable dust tight bag mouth clamp
- Pneumatic radial catch gate
- Pneumatically operated retractable bag hooks

About Packweigh

Packweigh Equipment design & manufacture as well as import equipment from all over the world, and with a modern workshop and engineering department, can furnish an innovative solution to supply you with equipment to suit your specific needs.

Packweigh Equipment also carries an extensive range of spare parts and has the expertise and staff to service your machinery for smooth and trouble free operation.
