

# INNOBULK GS

BULK BAG FILLING MACHINE WITH AN AUTO BAG RELEASE.

This system is designed for the operator to hang the bags from one side. This system facilitates easy bag handling for operators. The hanging hooks conveniently move towards the operator side, allowing them to easily hook the bag loops on. Then retract, ensuring that the bag hangs freely and the bottom corners fill evenly with product.

Once the weighing is complete, a forklift is used to place a pallet under the bag to raise it. As the weight is lifted, the hooks and bag clamp automatically release the bag. This allows the bag to be removed without the driver ever needing to leave the forklift.

**PACKWEIGH**  
INNOVATIVE PACKAGING SOLUTIONS

## Features

- Suitable for all bag sizes
- Rinstrum panel mount weigh controller
- LCD display with LED back lighting
- 24vdc controls
- Supports optical communication with a PC
- IP 65 enclosure
- 4- high quality shear beam load cells
- Powder coated mild steel construction
- Inflatable dust tight, bag mouth clamp
- Pneumatic radial catch gate
- Pneumatically operated retractable bag hooks

## About Packweigh

Packweigh Equipment design & manufacture as well as import equipment from all over the world, and with a modern workshop and engineering department, can furnish an innovative solution to supply you with equipment to suit your specific needs.

Packweigh Equipment also carries an extensive range of spare parts and has the expertise and staff to service your machinery for smooth and trouble free operation.
